Nutrition Your Body Needs

IMMUNEX

A PROFESSIONAL DIETARY SUPPLEMENT FOR IMMUNE SUPPORT

Like a well-oiled machine, a properly-functioning immune system requires a coordinated effort from multiple components to efficiently combat dangerous viruses, bacteria and other pathogens. Eating right and getting enough of both exercise and sleep are a few of the crucial supports needed to optimize the immune system's complex machinery. However, maintaining all three of these immune-strengthening habits is not always easy and neglecting any of them can result in a weakened and less-prepared immune response. Other factors which reduce our immune function include stress, environmental pollutants, and aging. Our modern lifestyle, with its poor diet, amplified stress levels and over-scheduling, plays a major role in placing our immune system at a disadvantage. Too much refined sugar, for instance, has been shown to decrease white blood cells' ability to engulf certain pathogens. Studies have also shown that individuals with chronic stress have reduced white blood counts. Finally, sleep deprivation is reported to reduce natural killer and cellular immune responses.

Fortunately there are numerous dietary ingredients that can strengthen a weakened immune system. The challenge is to find a supplement that supports all the pieces of this complex machine including the external factors that make your body more vulnerable to attack.

Immune Naturally Boosts Your Immune System When You Most Need It

Our Immune formula was developed to enhance your immune system with a unique combination of immunostimulatory and adaptogenic vitamins, minerals and traditional herbs.

- **Vitamin C**—Studies have shown it may reduce the symptoms and duration of a cold.
- **B-Vitamins**—Improve the efficiency of the immune system as well as combat stress.
- **Garlic** – Its active compound allicin has been shown to block key enzymes that aid bacteria and viruses invade and damage tissues.
- **Echinacea purpurea & augustifolia** – Clinical studies report this immune-enhancing herb may lessen symptoms and shorten the duration of an infection.
- **Neem leaf** – Contains phytochemicals called glycoproteins that have been shown to be effective in maintaining normal immune homeostasis.
- **Isatis Root** - Used in Traditional Chinese Medicine for its antimicrobial, antiviral and immunostimulatory effects.
- More traditional immune-enhancing herbs such **Solanum nigrum**, **bai-zhu** **atractylodes root** and **codonopsis root**.
- Adaptogenic herbs such as **reishi mushroom** and **astragalus** help the body resist fatigue, anxiety and other stressors that weaken the immune system.

* %DV (Daily Value) not established		

OTHER INGREDIENTS: GELATIN (CAPSULE), ORGANIC BROWN RICE FLOUR.

The information in this brochure highlights some of the scientific evidence supporting the choice of ingredients found in Salmon Oil. This material is for educational purposes only. Ingredient levels in the formula may or may not match those used in clinical studies and therefore is not to be construed as making any claim for the product. We hope you enjoy the information presented, to increase your knowledge of these natural substances.

Located in the foothills of the Rocky Mountains, Empirical Labs is a leading manufacturer of therapeutic dietary supplements exclusively for professional healthcare practitioners. Supplying our products to healthcare professionals allows us to receive direct clinical feedback which we use to continually evaluate and improve our formulas.

Our intricate formulas are clinically designed using a multi-disciplined approach to healthcare by combining the expertise from various medical disciplines including Traditional Chinese Medicine, Ayurvedic Medicine, as well as Western medicine. By integrating these diverse and revered medical systems we have developed stimulating, yet gentle formulas which merge the benefits of traditional herbs, superfoods, extracts, vitamins, minerals, amino acids and enzymes. Our ingredient list contains no window dressing – each and every ingredient has a distinct purpose in the formula. Nor do we overuse any individual ingredient to avoid causing unnecessary sensitivity buildup to the formula. The quantity of every ingredient and the precise combination of ingredients has been chosen so that their diverse therapeutic mechanisms are balanced together to reliably reach a single targeted health outcome.

Our formulas are powerful, yet gentle, enough for every day use and contain no harsh or unnecessary carriers.
